

OUTRIGGER PADS

ECOLIFT (Recessed) Pad Range

Features include:

- 12-15 tonne load capacity
- Lightweight and easy to handle and store with minimal effort
- Provides tough and stable support for jack and levelling legs on grass and soft ground
- Made from extremely high quality, high molecular weight polyethylene (HMWP)

Compression Test

Test Objective

To carry out load compression test using 140mm diameter pushing block.

Test Data

The pads were placed in the compressive machine and load gradually increased to 20 tonnes. No deformation recorded.
