

# GROUND PROTECTION MATS

Lightweight and versatile, our range of durable ground protection mats offer the perfect solution for moving vehicles and heavy machinery across soft or sensitive ground. Create temporary low-maintenance roadways and surface areas for equipment loads of up to 65 tonnes, with the flexibility to configure and adapt from one job to the next.

## BENEFITS

### INTEGRATED HANDLES

Easy grip integrated handles so they can be safely lifted, positioned and manoeuvred around the work site.

### TOUGH ENOUGH

Engineered to withstand heavy load transfers, providing maximum strength and support with minimal disturbance to the ground.

### SAFE & SECURE

Designed for maximum grip and resistant to water, corrosion and splintering. Available with 'non-slip' extruded surface.

### FLEXIBLE CONFIGURATION

Quickly and easily install temporary roads, tracks and pedestrian walkways for a low cost and safe surface area.

# EXTRUDED MATS

Lightweight, extruded ground protection mats designed to be safely and quickly installed by two people, taking loads of up to 65 tonnes. Ideal for creating low cost temporary access and track ways over soft surface areas with minimal disturbance to the ground.

## KEY FEATURES

- Up to 65t load capacity per mat
- Extruded non-slip surface for maximum grip
- Lightweight and easy to handle, lift and position
- Flexible and easy to adapt from site to site
- Low-cost temporary roads and track ways
- Waterproof and resistant to oils and chemicals
- Maintenance free
- Engineered from high quality High Density Polyethylene (HDPE)

**UP TO  
65T LOAD  
CAPACITY**

## APPLICATIONS

- Ground work cover
- Industrial flooring
- Temporary walk and trackways
- Festival and outdoor event flooring
- Lawn protection

# FLOOR PROTECTION

High performance floor protection mats to provide temporary access for moving vehicles and heavy equipment over paved or sensitive flooring. A much safer alternative to wood, these lightweight and low maintenance floor protection mats can be quickly and easily installed by one person, and safely moved from site to site afterwards.

## KEY FEATURES

- Up to 40t load capacity per mat
- Lightweight and easy to handle, lift and position
- Flexible and easy to adapt from site to site
- Low-cost temporary roads and track ways
- Waterproof and resistant to oils and chemicals
- Maintenance free
- Engineered from high quality Ultra High Molecular Weight Polyethylene (UHMW-PE)

**UP TO  
40T LOAD  
CAPACITY**

## APPLICATIONS

- Indoor floor protection
- Kerb and tarmac protection
- Block paving protection
