

TEST RAMPS

Lightweight ramps with high load-bearing capabilities designed to assist engineers and technicians with axle testing and maintenance on heavy plant, powered access platforms and vehicles.

Features include:

- Ribbed non-slip surface for extra grip
- Two integrated carry handles, making them safer to handle and position
- 15° angle inclination
- Designed for maintenance and testing to be carried out on the Oscillating system
- Resistant to water, chemicals and oils

EASY TO HANDLE

Lightweight with two integrated handles making it easy to lift and position into place.

SAFE & SECURE

Resistant to water, corrosion and splintering – so much safer than wooden ramps and much lighter than the steel alternatives.

IN STOCK

We won't keep you waiting! Our products are held in stock, ready to ship for immediate delivery.

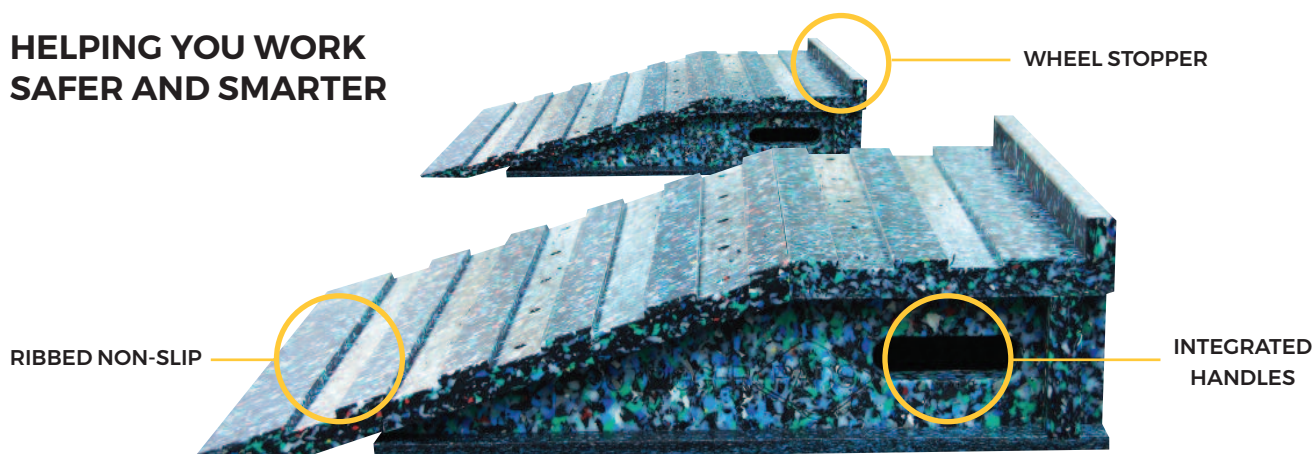

TOUGH ENOUGH

Engineered from heavy duty UHMW-PE providing maximum strength and support.

TEST RAMP

DESCRIPTION	DIMENSION (MM)	WEIGHT (KGS)	LOAD CAPACITY (TONNES)	PART NO.
